

BUCK BARRIER™

SHIELD YOUR CROPS. PROTECT YOUR YIELDS.

Deer are no longer just a nuisance — they're a major yield threat. *Buck Barrier™ is a plant-based foliar product that protects soybeans and corn from deer browsing. Backed by real-world results and trusted by top-tier farmers, Buck Barrier is safe, effective, and easy to apply.*

5 REASONS FARMERS USE BUCK BARRIER

- 1. Proven Deer Repellent**
Reduces deer feeding in soybeans and corn fields — with noticeable results in 24-48 hours.
- 2. Plant-Based, Non-Toxic Formula**
Safe for humans, pollinators, and pets. No harsh chemicals or residue concerns.
- 3. Multiple Application Options**
Apply in-furrow for seedling protection until a traditional post emergence herbicide application can be made.
- 4. Easy to Apply with Your Foliar Pass**
Compatible with existing foliar programs. Can also be broadcast with soil applications.
- 5. Backed by Top Growers & Agronomists**
If it works for them—it can work for you.
